

**Department:** School of Business  
**Role:** Curriculum Developer, BSc (Hons) Computing modules

The University of Gibraltar, modelled on the academic practices of UK Universities, was founded in 2015. As an institution it is committed to high-quality teaching and learning.

Currently the University's School of Business is growing its offering by developing a BSc (Hons) degree which will combine various contemporary business and computing modules.

As such, the University is seeking a curriculum developer to assist with development of various computing modules (e.g. production of module descriptors, lecture outlines) that will range from level 4 to level 6 and cover subjects such as:

- Programming Essentials
- IT Essentials
- Intro to Web Design
- Networking Essentials
- Introduction to Cyber Security
- IT Project Management
- Operating Systems
- Cloud Computing
- Electronic Commerce
- Databases
- Advanced Programming
- Ethical Hacking

It is anticipated that this project will be undertaken remotely. Please send expressions of interest with indicative fees and an accompanying CV to [vacancy@unigib.edu.gi](mailto:vacancy@unigib.edu.gi)

Your CV should contain the following information:

- Current and recent employment history
- Higher Education (HE) and Professional Qualifications
- Experience of UK HE programme/module curriculum development
- Research and related Scholarly/ Professional Activity/ Consultancy

**Closing date: Monday 6 December 2021**
